Sprint 3 Review

Sprint 3:

Completed user stories:

- Finalize product deployment strategies (branding and domain), build community endpoints

- As a trendy person, I would like to read interesting and noteworthy articles bookmarked and catalogued so that I can keep up-to-date with news.

Uncompleted user stories:

- As a frequent LoLStat user, I want to view live Twitch Streams in a section of the website, so that I don't have to load a new page.

- As a LoLStat user, I would like to watch a Twitch Stream on the community section of the website so I can also view stat analysis of the players.

Summary: We weren't able to provide a website where a player can view twitch streams, but we did link some interesting websites/articles, and finalized the product so the overall user experience is satisfying.

Actions and Activities that our team plans to remember/use for future projects

Stop
- ● Working on tasks without moving it on the Scrum Board

Start
- ● Don't overestimate the work you can get done

Continue
- ● Having regular Scrum Meetings
